

LICHT

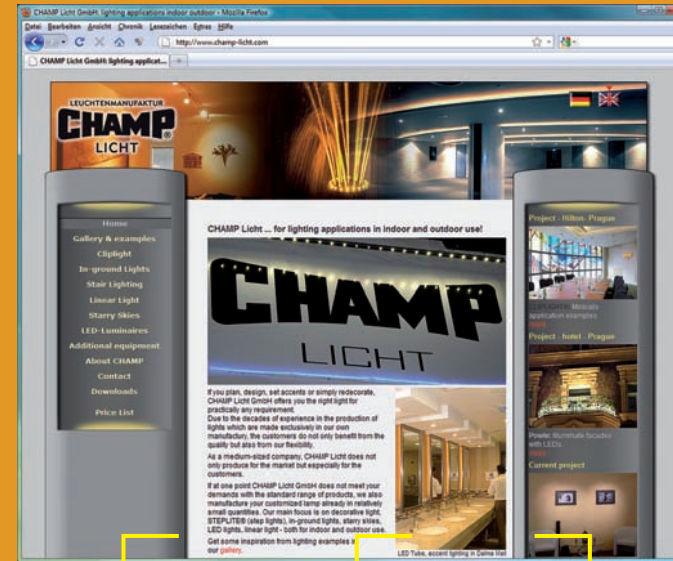

LEUCHTEN MADE IN GERMANY

MADE IN GERMANY

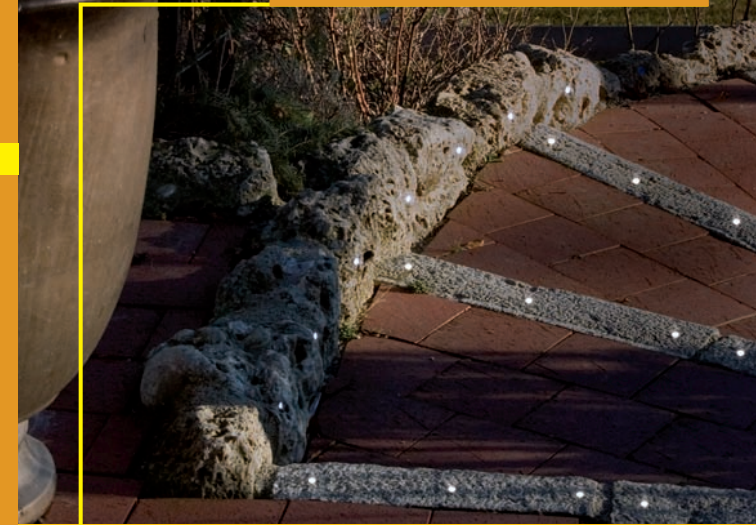

We only use high-quality primary products of prestigious manufacturers (Nichia®, Osram®, Phillips®, etc.) for our production and manufacture exclusively in our own factory in Bavaria. Our strong points are flexibility, technical support and customized production even in low volumes.

ON THE INTERNET

Information on CHAMP luminaires ever up-to-date can be found on the internet under www.champ-licht.com. Detailed product descriptions, product photos and application examples assist you in providing your customers with optimal advice.

LED Luminaires

LED luminaires for all applications which require small, durable, decorative and energy-saving lighting elements.

Stair Lighting

Functionality, discreet design and a very long service life are the center of attention in this case. A great number of versions offers the possibility to realize every individual lighting effect on stairs.

Cliplight

The smallest low-voltage rail system for Halogen, Xenon and LED lights on the world market. The lights are simply clipped anywhere onto the transparent, UV-stabilized polycarbonate rail, which can be shortened individually.

In-ground Lamps

By installation depth of 8 to 100 mm, the in-ground lamps are universally usable. Safe, simple and fast installation, because of the C-IP67 plug system. By using LEDs from the best manufacturers on the market, the useful LED-life is 60,000 h.

Linear Light

Linear light – diverse possibilities to light façades, realize indirect illuminations, mark paths, set accents on walls or to let whole bridges „be ablaze with light“.

Starry Skies

Starry skies are very versatile, available in different versions (Deco-fiber, LED) and very easy to realize.

Additional Equipment

We do not only „produce“ the light for you, but also many other things useful for mounting and operating your lighting systems.
